

AULIA RAMADHANI

Software Engineer | Full Stack Developer

Bandung | [\(+62\) 85704066386](tel:+6285704066386) | aualily9888@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Fresh Graduate in Telecommunications Engineering from Telkom University with 1 year of hands-on experience in software development through professional, research, and full-stack projects. Experienced in developing end-to-end applications across frontend, backend, REST APIs, databases, and third-party service integrations. Proficient in Python, SQL, JavaScript, TypeScript, React, Next.js, and Laravel, with practical experience in backend development, system integration, authentication, data processing, and AI/LLM integration. Experienced in developing enterprise and cybersecurity applications involving multi-source data processing, threat intelligence, and automated analysis. Strong problem-solving, analytical thinking, teamwork, and adaptability.

EDUCATION

Telkom University - Bandung, Indonesia

September 2022 - August 2026

Bachelor Degree in Telecommunications Engineering, 3.34/4.00.

PROFESSIONAL EXPERIENCE

Research Assistant - Cyber Physical System Laboratory

May 2024 - May 2026

- Developed SiJaga, a web application for managing storage equipment provided for community service activities, "Implementasi dan Sosialisasi Tempat Penyimpanan dengan Keamanan Cerdas Menggunakan Teknologi RFID di Kantor Desa Sukapura." Integrated RFID (Radio Frequency Identification) technology for inventory tracking and access control.
- Contributed to the user interface design and development of a Learning Management System (LMS) for the laboratory study group event, Cyber Academy. Enabling students to access learning modules and participate in discussions.
- Developed Boostify, a web application for attendance management using face recognition to help record and monitor assistant attendance accurately and efficiently.

Full Stack Web Developer - PT Telkom Akses (Internship)

June 2025 - August 2025

- Developed New Alista (Application of Logistic and Supply Telkom Akses), a WMS (Warehouse Management System) designed to support construction operations.
- Developed a reservation module including HSA (Home Service Access) approval, PM (Project Manager) approval, and reservation listing to streamline material reservation workflows.
- Implemented OTP-based authentication integrated with a Telegram bot, enhancing system security and user verification.
- Participated in the "Bootcamp Development New Alista" at Royal Malioboro by Aston, Yogyakarta. Completed 100% of the tasks and contributed to System Integration Test (SIT) with the team, Project Manager, and user.

Practicum Assistant - Basic Computing Laboratory

June 2023 - June 2025

- Assisted students in 12 modules of Algorithm and Programming Practicum through hands-on coding exercises using C language.
- Provided mandatory academic assistance to students outside regular lab sessions to support understanding of core concepts, debugging, and program optimization of the final project.
- Evaluated and examined students in the final stage of the practicum, including assessment of a final project involving the development of a complete C program, accompanied by a flowchart and technical report.
- Collaborate with assistants of the laboratory to develop instructional materials, review and grade assignments, and ensure smooth and effective lab sessions.

PROJECTS

- **Cyber Fusion**, [Github](#)
 - Developed a web-based Cyber Threat Intelligence platform for collecting, processing, enriching, correlating, and visualizing Indicators of Compromise (IoC), including IP addresses, domains, URLs, and file hashes.
 - Integrated VirusTotal, AbuseIPDB, and MISP APIs to consolidate multi-source threat intelligence into a unified threat analysis workflow.
 - Developed frontend and backend components and implemented API-based communication between the application, external intelligence platforms, and AI services.
 - Implemented IoC processing and threat correlation to combine intelligence from multiple sources and support automated threat assessment.
 - Developed a threat scoring mechanism using intelligence from multiple sources and defined evaluation criteria to support threat prioritization.
 - Integrated an LLM (Large Language Model) into the threat analysis workflow to interpret enriched cybersecurity data and generate contextual threat analysis.
 - Designed system workflows and architecture using ERD, DFD, Flowchart, Use Case, Activity, and Sequence Diagrams.
 - Built frontend dashboards to visualize IoC enrichment results, threat assessments, correlated intelligence, and LLM-generated analysis.
 - Used Docker to containerize and manage the application development environment.
- **Alista**
 - Developed the Reservation module for managing material requests, HSA approval, PM approval, and reservation workflows using Laravel.
 - Implemented OTP-based authentication using Laravel and the Service-Repository Pattern, with Telegram Bot API integration for OTP delivery.
 - Contributed to database design and ERD development for the application.
 - Performed SQL database operations, including schema design, data migration, and query testing using DBeaver.
 - Conducted REST API testing and validation using Postman to support backend reliability and integration.
 - Used Git and Bitbucket for version control and collaborative development.
 - Participated in System Integration Testing (SIT) with the development team, Project Manager, and users.
- **SiJaga**, [Github](#)
 - Designed and implemented responsive UI/UX interfaces to improve usability and simplify equipment management workflows.
 - Transformed UI/UX designs into responsive and interactive web interfaces using Next.js, ensuring optimal user experience across desktop and mobile devices.
 - Integrated RFID (Radio Frequency Identification) technology for real-time inventory tracking and secure access control.
 - Integrated the front-end application with backend REST APIs for real-time data communication, inventory management, and user authentication.
- **Boostify**, [Github](#)
 - Implemented responsive and modern user interfaces by transforming UI/UX designs into scalable web applications using Next.js.
 - Integrated the application with backend REST APIs for attendance data processing, authentication, and face recognition services.

CERTIFICATES & LICENSES

Certificate of Completion Fundamental UI Design	Jan 2026
Certificate of Completion Fundamental UX Design	Jan 2026
ECCT (English Communication Competence Test): 3.75/4.00	March 2025
EPRT (English Proficiency Test): 560/677	April 2026

ORGANIZATION

General Secretary - Cyber Physical System Laboratory June 2025 - May 2026

- Managed and maintained all administrative documentation for both internal and external laboratory activities.
- Coordinated communication between the laboratory supervisors, executive board, members, and external stakeholders to ensure smooth information flow.

Secretary of Community Service - Cyber Physical System Laboratory Jan 2025

- Contributed to the project “Implementasi dan Sosialisasi Tempat Penyimpanan dengan Keamanan Cerdas Menggunakan Teknologi RFID di Kantor Desa Sukapura.”
- Managed event timelines, rundowns, and administrative tasks.

AWARDS

Silver Medal at Advanced Science Olympiad - Pusat Olimpiade Sains Indonesia	July 2021
Silver Medal at Kanigara English Grammar Olympiad 1.0 - Kanigara Education	May 2021

SKILLS & TOOLS

Hard skills:

- **Programming Language:** Python, SQL, JavaScript, TypeScript, PHP, C/C++.
- **Software Engineering:** Full Stack Development, Backend Development, REST API Development, API Integration, Database Design, Authentication & Authorization, System Integration, Software Testing.
- **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap.
- **Backend:** Laravel, Express.js, Hono.js, FastAPI.
- **Database:** MySQL, PostgreSQL, Supabase.
- **AI & Data:** Large Language Model (LLM) Integration, Data Processing, Cyber Threat Intelligence Analysis, Face Recognition Service Integration.
- **Development Tools:** Git, Bitbucket, Postman, DBeaver, MySQL Workbench, Visual Studio Code, Figma.

Soft skills:

Problem Solving, Analytical Thinking, Critical Thinking, Team Collaboration, Communication, Leadership, Adaptability.
